

UF16

HIGH EFFICIENCY FILTER UNIT

*Efficient Dust
Retention*

*Automatic
Cleaning System*

*Suitable for Potentially
Explosive Atmospheres*

Discover the power of the Filter Unit Model UF. Perfect for centralized systems or connecting to big Vac-loaders, it ensures effective dust retention and hassle-free cleaning for uninterrupted performance.

- Hopper Retains Materials, Even in Extreme Dust Conditions
- Filtering Bags with Compressed Air Injection for Efficient Cleaning
- Autonomous Cleaning System Managed by an Electronic Board
- Hopper with Inspection Door and Maximum Level Indicator
- Manual or Automatic Discharge Valve Options for Easy Material Removal

Specification :

Hopper volume m ³	0,5	1
Dimensions mm	Dn 1.150 x H=2150	Dn 1.150 x H=2 300
Weight Kg.	800	900
Diameter of discharging flange mm.	250	250
Filtering surface	m ² 16	m ² 16
Level gauge	YES	YES
